Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO 8117 was prepared by Technical Committee ISO/TC 72, *Textile machinery and machinery for dry-cleaning and industrial laundering*, Subcommittee SC 3, *Machinery for fabric manufacturing including preparatory machinery and accessories*.

This second edition cancels and replaces the first edition (ISO 8117:1986), which has been technically revised.

Textile machinery — Knitting machines — Nominal diameters of circular machines

1 Scope

This International Standard specifies the nominal diameters of circular knitting machines and the numerical designations corresponding to the size of the machines. It is applicable to small- and large-diameter circular knitting machines and to sinker machines.

2 Normative references

The following referenced documents are indispensable for the application of this document. For dated references, only the edition cited applies. For undated references, the latest edition of the referenced document (including any amendments) applies.

ISO 7839, *Textile machinery and accessories — Knitting machines — Classification and vocabulary*

ISO 8188, *Textile machinery and accessories — Pitches of knitting machine needles*

3 Nominal diameters and numerical designation

For classifications and the vocabulary of knitting machines, see ISO 7839; for needle pitches, see ISO 8188. Table 1 specifies the nominal diameter, in millimetres, and the numerical designation applicable to each machine size.

Table 1 — Circular knitting machines

Small circular knitting machines		Large circular knitting machines	
Nominal diameter	Designation	Nominal diameter	Designation
57	2 1/4	178	7
64	2 1/2	190	7 1/2
70	2 3/4	203	8
76	3	229	9
83	3 1/4	254	10
